

Singular™ from Ideal Standard

Solutions for offices & public spaces

Ideal Standard

Sector book series

Ideal Standard is Singular™
The choice is yours.

Singular aims to offer a vast array of solutions from the Ideal Standard catalogue, so you can create your own. From the home to hospitals, we offer bathrooms and washrooms that meet every possible need.

Singular is more than just an idea. To illustrate Singular, we have developed a series of books where both inspiration and solutions come to life to offer endless possibilities and to present real project ideas. From taps to bathroom suites, from design to installation, Singular offers infinite solutions to architects, hotel managers and individuals thanks to Ideal Standard's highly experienced teams. Our sector books present well-defined solutions with information on styles, dimensions, colour palettes, technical performance, and specific details for each sector. Every one is a guide to rely on. Now, welcome into our offices & public spaces book.

Inspiring solutions for tomorrow.

Whether it's the latest colour trends, innovative new materials that allow for highly complex designs or sustainable solutions that help save water, at Ideal Standard we design all our products with the needs of our customers in mind. While we can look back on a proud history of pioneering technologies as well as a strong design heritage, we always keep an eye firmly fixed on the future to meet the ever-changing demands of modern living.

Where it all comes together.

Whether you're an architect, a specifier or a tradesperson, Singular™ offers a seamless journey to that one, perfect cross-category solution. Yours.

Where it all comes together.

From inspiration to installation, Singular™ is our end-to-end journey for creating endless cross-category washroom and bathroom solutions for all of our customers.

It's built on our understanding of customer and sector needs, and brings together our specification expertise, design and performance to create solutions that make life easier for everyone.

Innovation & Research

Our Design Centre in Milan.

We are always looking to respond to the needs of today and anticipate those of tomorrow. That's why we created a design centre in Milan - one of the most influential cities worldwide in the field of design.

There, under the guidance of Roberto Palomba - multi-award-winning architect and Chief Design Officer of Ideal Standard - our teams research trends, imagine new possibilities and transform them into products to depend on.

Our Awards

We design a purpose.

Our products are acclaimed by people throughout the industries we work with. The number of awards we've won is testament to our dedication to craftsmanship, quality and design.

Together for a better future

As one of the leading manufacturers in the bathroom industry, Ideal Standard has an important role to play when it comes to building a more sustainable future for the benefit of society.

We know that acting responsibly is fundamental to the long-term success of our business and will benefit not only our partners, customers and employees but also the wider communities impacted by our operations. That is why we are committed to embedding sustainability policies and practices into our everyday activities, ensuring we reduce their impact on the environment, create a safe and healthy workplace and produce high quality, innovative products.

We are taking important steps towards achieving and reporting on our environmental, social and governance goals, constantly pushing ourselves to think differently and implement changes that make a real difference. Together for Better is not just our brand statement, it is a promise that defines our entire business, touching every aspect of what we do.

Addressing issues that matter:

Energy And Carbon Reduction

Ideal Standard is actively working towards reducing its CO₂ emissions to achieve carbon neutrality. Recent and future key initiatives include transitioning to 100% renewable electricity in our UK ceramic site, investing in state-of-the-art furnaces in our fittings plants and installing photovoltaic panels in our German production facility, which combined reduces our carbon footprint by more than 3.800 tonnes of CO₂ per year. Additionally, we are trialling to switch from fossil fuels to green hydrogen technology to power our kilns, which is going to be a critical project to the ceramics industry as a whole. Ideal Standard is further assessing the feasibility of solar installations across additional sites and also actively looking at how the entire business can move to fully renewable electricity in the future.

Sustainable Packaging

We are dedicated to promoting the circular economy through the use of recyclable and sustainably sourced materials wherever feasible. Ideal Standard has already converted to 75% recycled plastic shrink wrap in most of our warehouse operations in 2019, reducing our virgin plastic consumption by 715.000kg to date. Furthermore, we are taking steps to remove all single use plastics in our fittings and ceramics packaging by the end of 2022, with the remaining product categories following in 2023.

Waste Management And Recycling

Ideal Standard is exploring a wide range of projects to support our zero-waste to landfill initiative. We are already recycling 100% of our brass waste material which results from the machining and grinding process, and re-melting it into brass ingots. Since 2019 we have recycled enough material to produce over 1 Million new basin taps.

All waste from our acrylic sheets used for producing bathtubs and shower trays gets fully re-granulated. In the last three years we have re-used around 4.000 tonnes of material which is sufficient to produce another 240.000 bathtubs.

Groupwide, we are re-cycling 80% of our ceramic waste in either our own production process or to produce other ceramic goods. The total re-used ceramic slip waste adds up to just over 9.800 tonnes per year which is sufficient to produce over 100.000 new wall-hung toilets. We are also recycling 1.500 tonnes of press cake per year, enough to produce 26 miles worth of waste pipes. By 2023, we are aiming to convert another 17.000 tonnes of ceramic waste into a variety of new products on a yearly basis.

Responsible Use Of Natural Resources

Additionally, Ideal Standard is planning to source 100% of the timber used in its products from sustainably managed forests by the end of 2022. Sustainable forest management offers a holistic approach to ensure forest activities balance social, environmental and economic benefits, not just for today but for the future too. We are committed to exploring other opportunities that help conserve our natural resources.

100 years of hygiene heritage. And counting.

The daily practice of hygiene is exactly that, something which should improve day after day. At Ideal Standard, we're incredibly proud to have played a leading role in that daily improvement for more than a century.

Today, we're more aware than ever of the need to keep raising standards and creating new solutions that deliver superior hygiene.

Through our research and industry-leading products, we make it possible to deliver safer, better, washroom experiences.

To shape the future of modern living, together.

Singular™
from Ideal Standard

Solutions for Offices

The office washroom leaves a lasting impression on employees and visitors. It is crucial to perception of your organisation, an opportunity to tell your brand story through design and performance. What do you want your washroom to say about you?

Where performance meets design.

Light design creates a space of calm and elegance. The flowing lines of the Connect Air vessel basins and WCs work in perfect harmony with the bright minimalist interior. They contrast with the striking Sensorflow tap in Black Onyx, featuring infrared technology to ensure outstanding functionality and water efficiency.

This performance brassware also allows self-expression, with two additional sleek finishes to choose from: timeless Chrome and modern Silk Black.

Technology that's smart and beautiful.

Intellimix® is the perfect combination of sleek, contemporary design, superior hygiene, enabled by a full soap cycle. Our smart touchless tap dispenses both water and soap, enabling you to manage quantities of both in a way that's both economical and sustainable.

This contemporary aesthetic is complemented by the Extra basin, which combines an architectural vision with sculpted geometry, working in harmony with Blend Cube WCs and Symfo flushplates for an overall look that speaks of effortless sophistication.

Meaningful technologies, Real benefits.

Our products are packed with meaningful technologies aimed at making life easier, safer, better. Here are a few key benefits our products offer.

Sustainability

Since the invention of the first ceramic cartridge in 1969, sustainability has been at the top of our agenda.

ECO FLOW REGULATOR

Our Eco Flow regulator reduces water consumption to 5L/min on taps, 8L/min on hand sprays and 12L/min on shower heads, without compromising on comfort.

BLUESTART TECHNOLOGY

Saves energy by releasing unheated water when the tap is opened from the centred (and most frequently used) position.

Safety & Comfort.

TEMPERATURE SAFETY BUTTON

Limits water to 40°C to protect vulnerable users when required.

COOL BODY

Ensures surface does not get hot in use and eliminates the risk of user scalding.

LIGHTMOVE®

The FirmaFlow® cartridge enables finer temperature adjustments between 34°C and 42°C.

IDEAL COMFORT

Always the perfect height between the tap and the basin – adapted to your needs.

TEMPERATURE LIMIT STOP

Can be pre-set to protect vulnerable users when required (installation optional).

An intelligent use of space.

Limited space does not restrict creativity; it enhances it. This is where clever design shows its worth, with a stunning look achieved in smaller surroundings.

The compact rectangular stylings of the Extra handwash basin are complemented by a Blend Cube WC, which features AquaBlade® technology for a cleaner, quieter, more efficient flush. All of this is set off by the curved aesthetic of Joy brassware in sleek chrome or Ideal Standard's beautiful finishes Brushed Gold, Magnetic Grey and Silver Storm.

Solutions for Office Kitchens

Where self-sustaining drinks are brewed, conversations are had and informal meetings are held, your office kitchen is an important place. This is a space that deserves the contemporary aesthetics that only Ideal Standard can create.

Ergonomic design, effortless to use.

Today's kitchens demand elegant aesthetics and exceptional robustness. Because of their frequent use, finding the right balance between form and function is especially important when it comes to kitchen taps.

Years of know-how in the fittings sector, expertise in design and German engineering enable us to offer a range of high quality taps that are not only effortless to use and ergonomic but also water saving and extremely durable.

Solutions for Restaurants

This is a place where interior design is crucial; where the washroom must reflect the effort put into creating an outstanding eating experience.

Singular™ allows you to create a space which beautifully complements your dining room, with superior manufacturing and product expertise that ensures robustness and durability.

Where hygiene and style combine.

Clean white ceramics combine with natural wood furniture to give this washroom a Scandinavian look. The sculpted geometry of the Extra basin combines beautifully with the curved styling of Joy brassware, which comes in four mixer styles and four finishes, including chrome and Ideal Standard's Brushed Gold, Magnetic Grey and Silver Storm.

Sphero urinals offer easy installation with smart features that detect blockages to prevent flooding, as well as anti-splash geometry and rimless design for superior hygiene and easier cleaning.

Inspired by an icon, created by you.

This is a space of purity and calm, where the clean white ceramics of the Blend Curve toilet and Linda-X basin are complemented by the contemporary and minimalist Symfo flushplate.

Linda-X has been inspired by the iconic Linda range, originally created by Achille Castiglioni, representing the fusion of sensual beauty and innovative design, while the Blend Curve toilet offers superior performance through AquaBlade® technology, which guarantees a cleaner, quieter, more efficient flush.

A palette of creative potential.

Our Ipolyss® ceramic collection expands the possibilities for self-expression with a bold range of new and heritage inspired colours. Diamatec® technology makes possible beautifully thin edges that are at once elegant and extremely robust. Combine the broad palette of Ipolyss basins with the colour finishes of Conca furniture for creative opportunities without limits.

Solutions for Retail

A busy environment with heavy use, these are washrooms that demand hard-wearing products with outstanding durability. Ideal Standard combines expertise in manufacture with superior raw materials and thoughtful design to ensure your facilities are robust and functional, yet with an aesthetic and performance that ensures an excellent user experience.

Design that puts you in control.

Connect Air toilets and Oleas flushplates in matching white bring an air of light and contemporary design to this washroom.

In the handwashing area, the Contour 21 wash trough combines a sleek aesthetic with the durability of a tried and tested product line, with Ideal Standard's smart Intellimix® taps providing a complete and optimal water-soap cycle.

Solutions for High Traffic

This is where the weary traveller stops, a pitstop on a journey where hygiene and durability are paramount. Our washroom solutions offer high performance products that can handle large volumes while offering excellent cleanliness and economy.

Superior build quality meets smart design.

Ideal Standard washrooms combine sleek and contemporary aesthetics with superior build quality and smart design that enhance user experience while ensuring durability and making cleaning and maintenance simpler and more economical. The robust white Silhouette trough combines here with Sensorflow infrared sensor taps which are available in chrome or Ideal Standard's Black Onyx and Silk Black finishes.

The clean and minimal look is completed by Sphero urinals, which deliver a smarter urinal range that's fit for the modern world.

Robustness that meets any challenge.

This is a space that demands robustness to ensure longevity in a demanding and high volume environment. The Silhouette wash trough is built to last, thanks to durable materials and Ideal Standard's manufacturing expertise, and comes in 120cm, 240cm and 300cm options.

The Sensorflow infrared sensor taps bring a sleek, contemporary look to the washroom, while also enabling greater control of water use, reducing costs and increasing efficiency.

Simple installation outstanding performance.

Sphero urinals introduce a range of performance, maintenance and installation benefits that make it an excellent option for sustainability and cost management. This includes a contemporary rimless design that also results in easier cleaning and clever features which make fixing quicker while protecting walls.

Sphero combines in this washroom with water-saving Sensorflow infrared sensor taps which come as rim, panel or wall-mounted options and the elegant, curved Connect countertop basin featuring an easy-to-clean design for greater hygiene.

Solutions for Colleges and Universities

Colleges and universities require robust washroom products that can withstand the demands of student users. But this doesn't mean aesthetics have to suffer. Here we bring you our outstanding solutions for beautiful spaces that have durability front and centre.

Where efficiency and hygiene meet design.

This is your opportunity to personalise with a washroom that inspires and excites. The handwashing area features stylish Edge taps combined with the elegant design of Adapto consoles, which are available in four colours. For ultimate creativity, the Ipolyss basin comes in 12 colours, crafted from patented Diamatec® ceramic for ultra-fine lines that are incredibly strong.

The Sphero urinal completes this space with water-saving and hygiene innovations as well as timeless aesthetics, available in mini, midi and maxi sizes.

Clever design that's crafted for economy.

A smart hybrid flush system takes efficiency to new heights in the Sphero urinal range. Crafted for economy, the maxi model pictured offers the benefits of a waterless unit with added hygiene, thanks to a smart sensor technology that detects salinity and urinal use, activating flushes and using water only when needed.

This clever technology is complemented by the light design of Strada II basins and the Edge wall-mounted basin mixer for a washroom that looks beautiful and functions perfectly.

Leaders in performance

From comfort and safety to hygiene, durability and sustainability, excellence in performance makes everything possible.

Combining experience and expertise allows us to push past limitations into new possibilities, and deliver innovations that set a new standard in washrooms and bathrooms. It's ingenuity at its best. It's leadership in performance.

Diamatec®

Engineered to enjoy.

Striving to achieve the most thin and precise designs in ceramics, Diamatec® was developed using a unique blend of alumina and chamotte. The result is a new material that allows you to achieve the near impossible: highly complex and challenging designs with unprecedented strength and durability. Combined with our colour palette, Diamatec® creates a look to enjoy.

• A unique blend of alumina and chamotte.

• A material that allows highly complex and challenging designs.

• Unprecedented strength and durability.

FirmaFlow®

Engineered to last.

We pioneered the ceramic disc cartridge in 1969 and this innovation redefined the way people used bathrooms and made it possible to create the single lever tap.

As the ultimate development of the original ceramic disc cartridge, some 50 years on, FirmaFlow® is the undisputed market leader with its innovative engineering and extraordinary durability, comfort and control lasting for twice as long as the industry standard.

Navigo®

Engineered for control.

Experiencing the ultimate control of water temperature and flow has never been easier than with Navigo®, supported by the hidden technology of the Easy-Box shower kit. The two upper knobs enable you to turn the water on/off and adjust the flow in one smooth movement. It's technology you can rely on.

● Sleek, minimalist look for the modern bathroom.

● Single push-button control of on/off water and volume.

● Precise and consistent temperature settings.

RimLS+®

**Engineered
for hygiene.**

With every flush, RimLS+® delivers a powerful whole-bowl clean with no place for bacteria to hide. Splash-free and easier to clean, RimLS+® is the go-to solution for busy bathrooms.

88% of households would buy an Ideal Standard Rimless+ toilet. A toilet with excellent hygiene performance.*

ProSys®

**Engineered
for your peace
of mind.**

The ProSys® installation system provides complete pre-wall solutions for all washroom fixtures: toilets, bidets & basins. With different products for solid and dry wall applications, ProSys® is ideal for a wide variety of projects. The versatile range combines seamlessly with ideal Standard's range of ceramics and fittings to ensure optimal performance. With end-to-end quality control and exceeding testing standards, the ProSys® system provides complete peace of mind.

*Result of a user survey commissioned by Ideal Standard and conducted by the institutes TCV-/isi-GmbH [n = 1,000 households with residential property – Germany n=500; Italy n=500], based on the outcome of external test conducted by X-Tech srl for Ideal Standard measuring hygienic parameters of the toilet flush [unwashed toilet area, number of water splashes]. Scientific Supervision of User Survey: Prof. Dr. Andreas Scharf, University of Applied Sciences Nordhausen

Aquablade®

Engineered for hygiene.

Silent, superior, splash-free flushing, even at low water volumes.
For spaces where hygiene is paramount, and for washrooms where first impressions are essential, AquaBlade® is the ultimate design solution.

CLEANER
AquaBlade® technology ensures 95% of the surface is cleaned every time.

QUIETER
AquaBlade® is proven to be up to 25% quieter than equivalent models.

SMARTER
More effective and efficient use of water compared to standard flushes.
